DESIGN

hello.

THE PEOPLE BEHIND EACH & EVERY PROJECT

creating unique experiences
through exceptional design.

what we do.

INTERIOR DESIGN | COMMERCIAL KITCHENS | FF&E SPECIFICATION | INTERIOR FIT-OUT

interior design.

Our inspiring and creative team works closely with all our hotel and leisure clients on interior design, brand development, FF&E specification, 3D and sketch visualisation, conceptual design and feasibility studies.

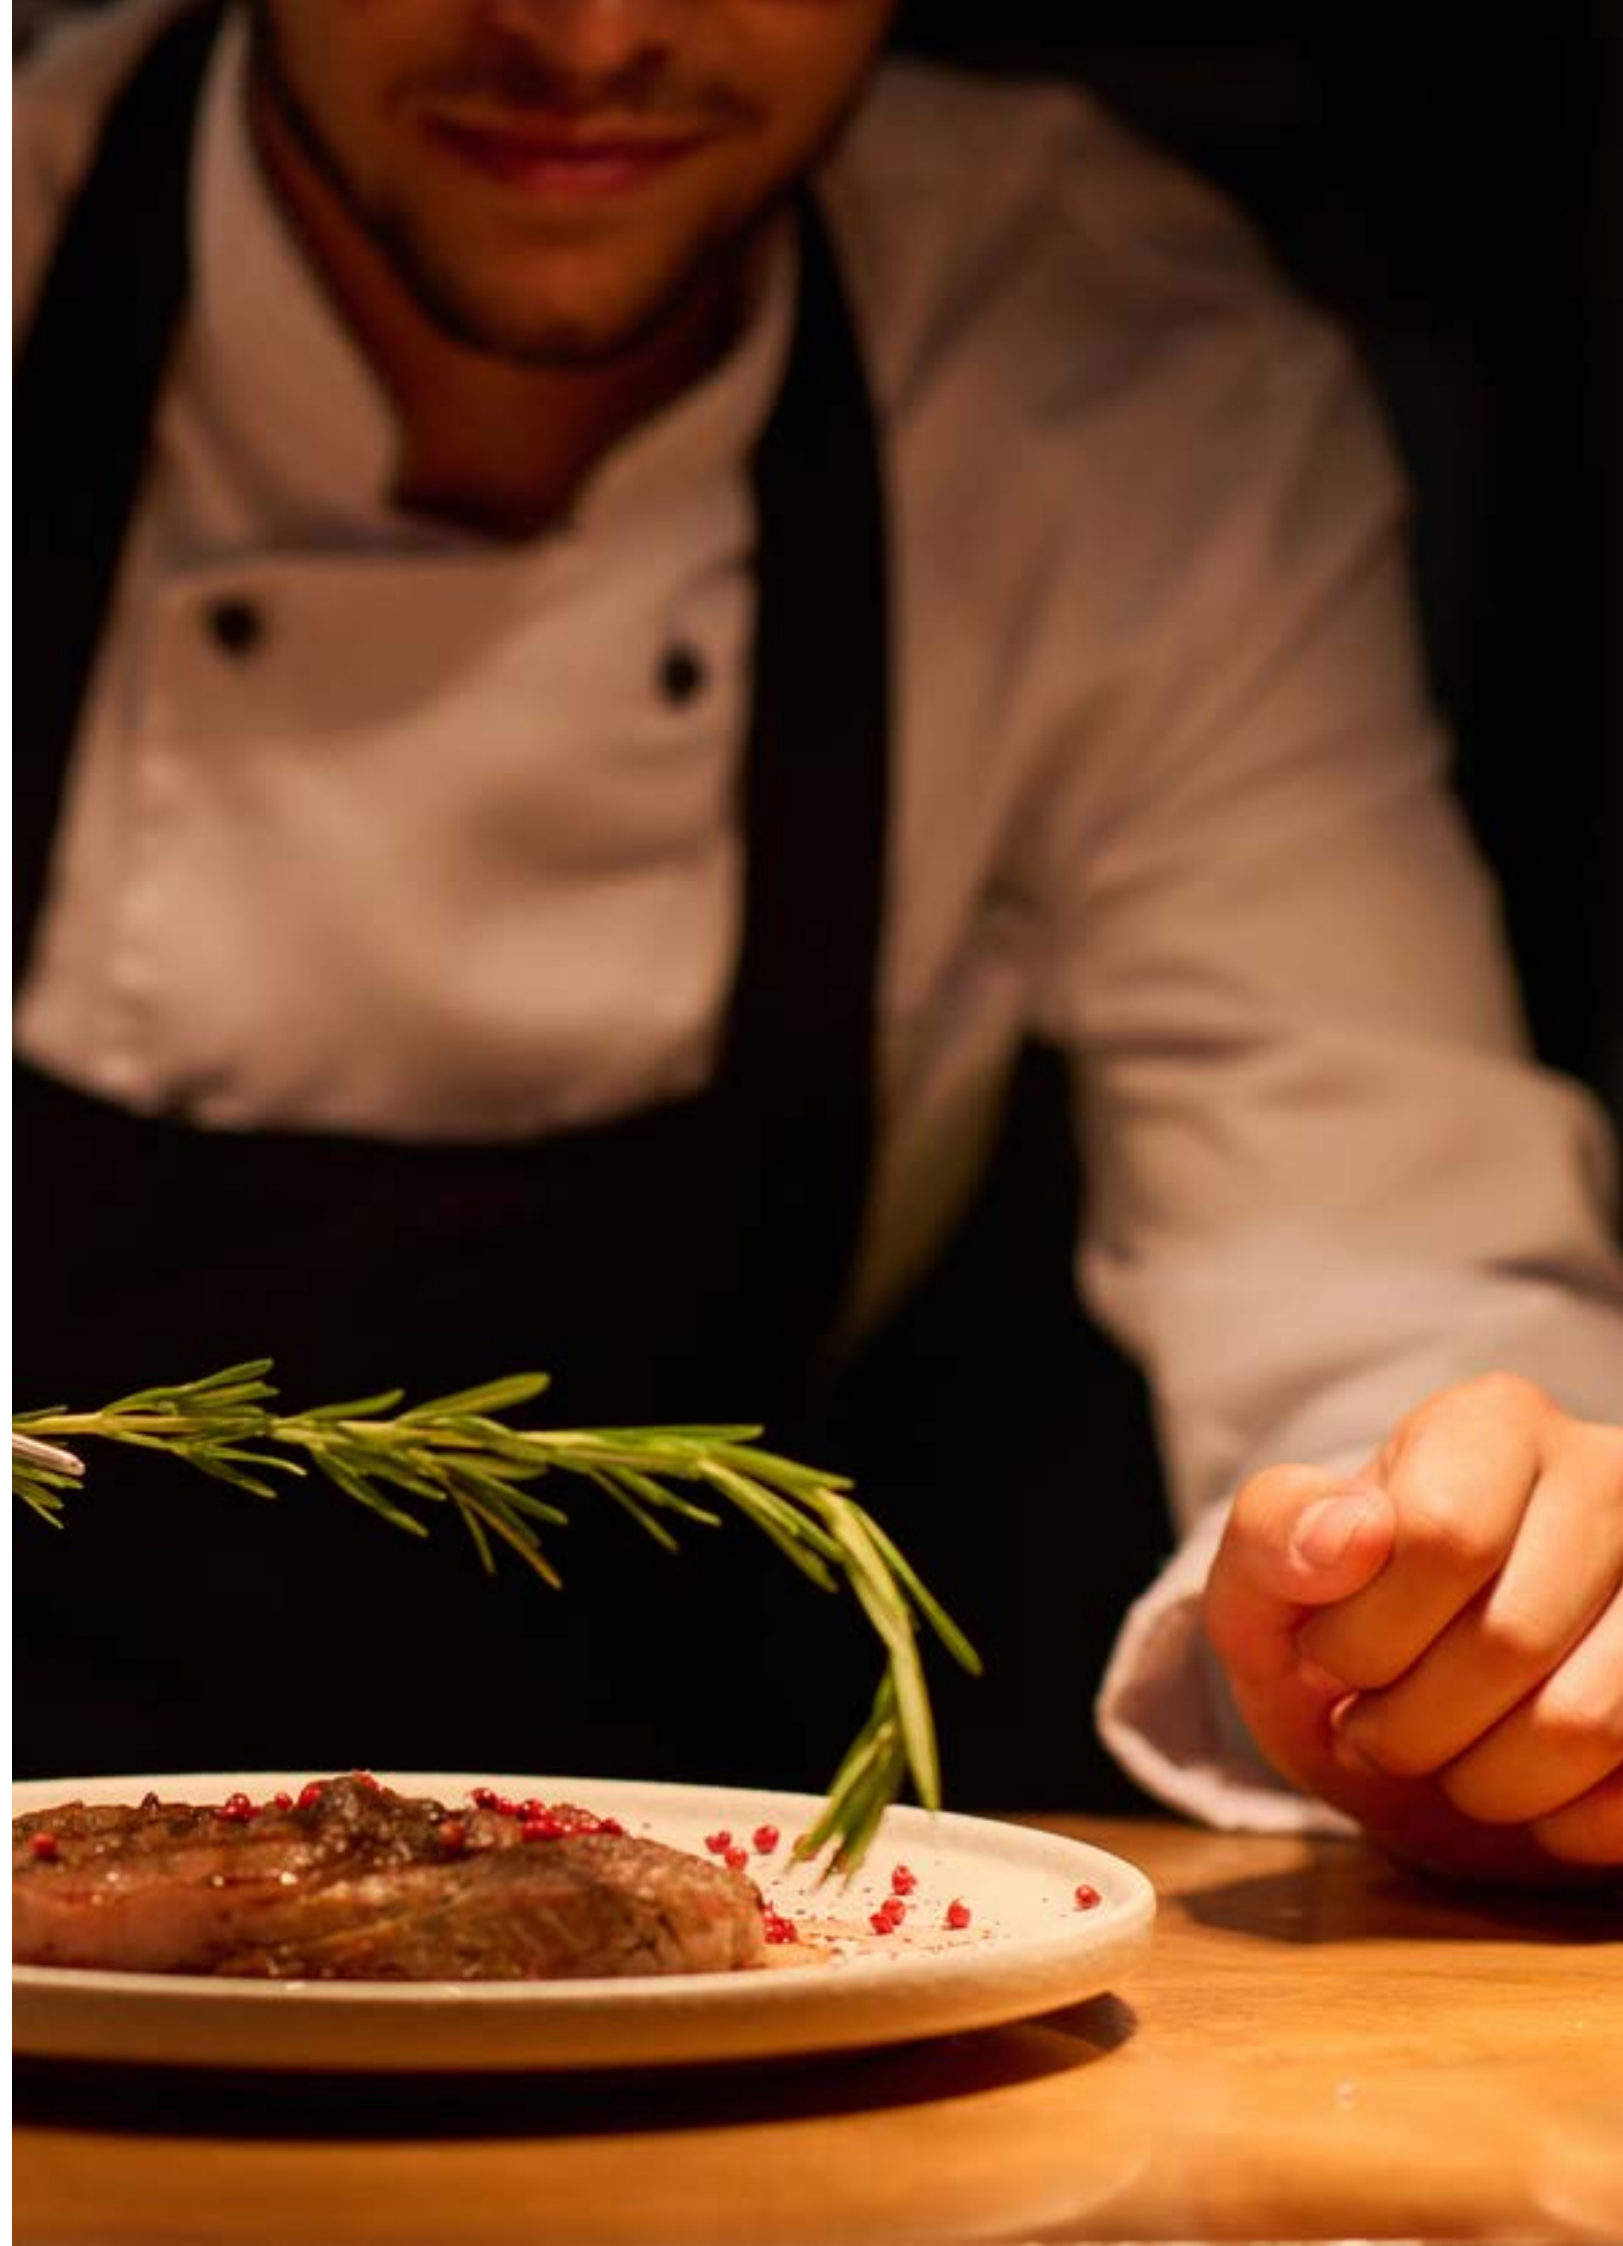

Before we start any design, our team will research every aspect of your hotel and leisure facility including food and beverage, bedrooms, public spaces and outdoor areas. It's important that you are involved with every element of the interior design process, and we have resources available to help you with all statutory approvals including planning, listed building consent and building control.

With extensive experience in interior, architectural, kitchen and product design, our team create designs which will wow your customers, whilst driving sales and creating a successful hotel and leisure venue.

commercial kitchens.

We offer the design, supply and installation of commercial kitchens. This includes kitchen planning, technical design and specification, cost control, procurement, and installation. Time and effort are invested into training the ABDA team to ensure we know what's new on the market and where we can source the most cost-effective and energy efficient equipment.

We will also work with your staff to ensure they are happy using the new products we install to increase efficiency and improve your team's confidence. With so much experience across the team, we have worked with most of the major manufacturers of commercial catering equipment. Sustainability is important to us and we create projects that stand the test of time whilst using eco-friendly and energy efficient products.

ff&e specification.

At ABDA Design our team spend a huge amount of time researching furniture, fixtures and equipment (FF&E) to ensure we create the highest quality and most memorable design for our hotel and leisure clients. When creating a design that your customers will love it's about the attention to detail as these are often the elements that consumers will take photos of and share with friends.

To ensure we are working with the leading FF&E suppliers, our team regularly research and meet with specialists to learn about new products and trends. By meeting with suppliers face to face, we can see, touch and discover new products which can be used in future design projects.

By working so closely and building relationships with our FF&E suppliers we can ensure timely delivery and installation to ensure your project runs smoothly.

interior fit-out.

We can take on the role of principal designer and contractor under CDM 2015 and we are Safe Contractor Accredited. Managing the processes and finances of a project can cause some clients stress and worry, which is why we offer full cost control and project management throughout the build and fit out process.

Our project managers will keep you updated from start to finish and guide you through the whole building process to give you complete peace of mind. We strive to make our designs as sustainable as possible with the sourcing of eco-friendly materials and equipment a key driver on projects. From detailed site surveys and full cost control to statutory approvals and complete project delivery, we will be with you at every stage you need us.
